## APPLICATION EXAMPLE

## PRODUCT INFORMATION

NOVOFLEX offers a large variety of high precise fine mechanic adapters to connect lenses and cameras of different manufacturers. With all adapters and/or adapter combinations infinity adjustment of the lens is possible. None of the adapters will transfer any function from the camera body to the lens. With almost all cameras automatic exposure metering (stop-down metering/aperture priority) is possible.

See page 2 for a list of all possible camera-lens combinations.

## WITH COMPLIMENTS

**NEW:** Adapters for MicroFourThirds cameras in combination with Leica M, Leica R, Nikon, Canon FD, Sony (Minolta AF), Minolta MD, Olympus OM, Pentax K, Contax/Yashica and M42 lenses.
